

Personal Organizer 4.5

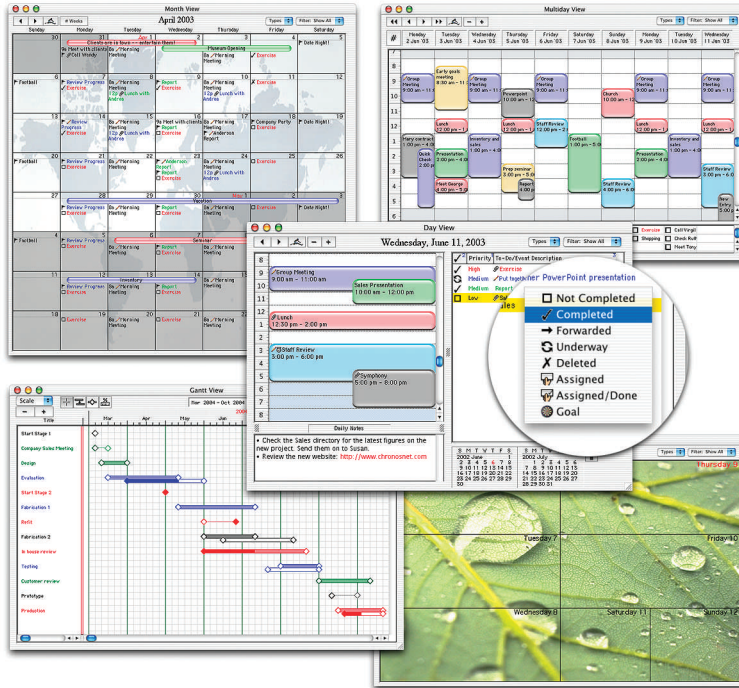

The most powerful organizer for Macintosh now has the ultimate Palm synchronization tool.

Personal Organizer is the Swiss Army knife of productivity software. It's a calendar, address book, word processor, project manager, memo taker, telephone dialer and alarm clock all rolled into one easy-to-use package.

Big Calendars

Personal Organizer offers calendar views that work the way you do—without boundaries. The Month View lets you see up to 6 months at a time. Get a bird's eye view of your schedule without flipping between months.

Gantt View

The Gantt View can be used to plan and track long-term projects in a time-line fashion. For each stage of the project, you can compare the projected start/end dates to the actual start/end dates. Progress can be displayed graphically and as a percentage.

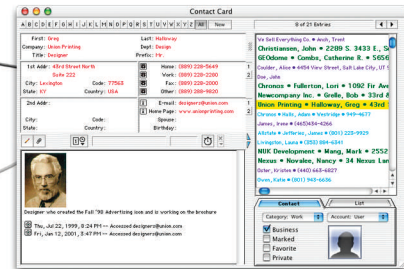

Palm & iPod Synchronization

Personal Organizer offers the most advanced Palm synchronization options available so you can confidently take your information on the road. There's good news for music junkies too: you can transfer your address book to your iPod.

Address Book

Keep all of your names, addresses and telephone numbers in Personal Organizer. It can dial your phone and create e-mail messages—all calls and messages are logged. You can store unlimited notes for each person. And if you use the Translate feature (e.g. type "Meet John tomorrow at noon") John's contact record will automatically be linked to the new activity.

Easy Scheduling

Use the Multiday View to quickly check your hourly schedule for available times. Since you can view from 1 to 60 days at a time, locating open slots is a breeze.

To-Do Tracking

Use Personal Organizer to track single or repeating to-dos. To-dos can be checked off in 8 different ways. If you miss a to-do, it will automatically be forwarded to the next day. And if you want to see how well you're following your exercise program, check out the graphical To-Do Statistics display.

Flexible Time Management

Personal Organizer comes with a complete set of calendars including Day, Week, Multiday, Month, Year, Gantt, and List views. Choose the calendar that's right for the job. For example, the Week View helps you focus on your schedule and to-dos for the current business week.

Which Chronos organizer is right for you?

Personal Organizer

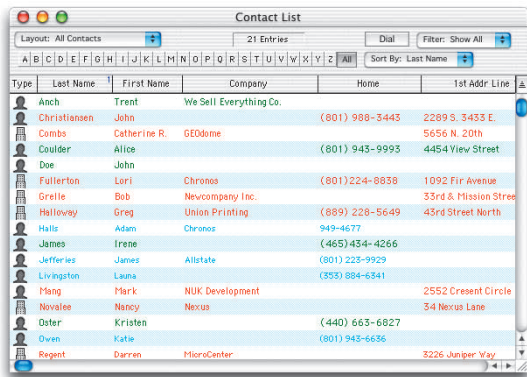

- A complete information management system for individuals or families.
- Each member of a family can have their own account.
- Sync to Palm's Date Book, Address Book, To-Do List and Memo Pad applications.

Group Organizer

- A client/server information management system for multiple users on a network.
- Share private and public data using different levels of access (read, read/write, blind read, no access).
- Company-wide calendars and address books.
- Disconnect PowerBooks from the network. Auto-sync changes when reconnected.
- Sync multiple private and company accounts over the network to a single Palm handheld.
- Visit www.chronosnet.com to learn more...

"Stellar work—indispensable product! I use it every day." — MacCentral

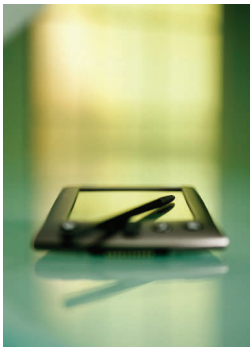

"The best personal information manager." — MacAddict

Produce brilliant reports

Use the built-in word processor to create sophisticated documents that can be linked to your activities and contacts. The Template Wizard takes information from your calendar or address book and automatically generates text documents. Personal Organizer comes with many standard templates, or you can create your own custom templates for unlimited creativity.

- Envelopes
- Labels
- Fax Cover Sheets
- Form Letters
- Telephone Lists
- Address Books
- Activity Reports
- Daily Agendas
- Contact Summaries
- To-Do Lists
- Daily Notes
- Custom Reports...

You call the shots

Other organizers force you to synchronize all of your information or none of it. But you may not want *everything* on your computer transferred to your Palm. Personal Organizer's Palm Sync Setup Wizard lets you choose which categories of information you want to sync with your Palm. Another industry first.

Expand your horizons

With the Palm Sync Setup Wizard, you can synchronize information from more than one person to a single Palm handheld. This means that you can store your spouse's to-do list and your son's soccer schedule on your handheld. No other organizer offers this degree of power and flexibility.

How does Personal Organizer compare?

You decide.

Personal Organizer	Entourage X 10.0	Now Up-to-Date & Contact 4.2	Palm Desktop 4.0
